Separable cable gland M32, multiple sealing insert, light grey

Item number: 2024984

The splittable cable gland V-TEC TB.. ensures - like all V-TEC glands - a secure sealing of the cable. The installation of pre-terminated cables or function cables, for example, is easy and quick, thanks to the splitting of the cable gland.

The V-TEC TB is also unbeatable when refitting an existing installation and as a "repair gland". There is no need to disassemble pre-mounted cables, it can be installed without interrupting the production process.

The sealing inserts are used to insert multiple cables through a gland. Depending on the application, the specified hole diameters are reduced by 1–2 mm when tightening the cable gland.
The ideal aids are the spreading pliers which can be used to open the sealing insert. With this tool, inserting the individual cables is quick and easy.

The gland set consists of an intermediate support, a cap nut and the seal. Of course, the split locknut is also in the scope of delivery.
Further multiple sealing inserts upon request.
